

Ashley Court...

There's no place like home.

We are very proud of Ashley Court, our special care home for the elderly, and people afflicted with memory loss.

Each staff member is carefully selected and specially trained. The ratio of staff to residents exceeds the minimum requirements of licensing. More importantly, everyone cares.

Each building is designed and staffed to accommodate different levels of care based on your loved one's needs.

Why we care...

Ashley Court was just what we needed, when we needed it! My dad was a resident of Ashley Court for over two years. Sharon and the staff provided a caring environment for him during this difficult time. Ashley Court helped him maintain a consistent lifestyle. Dad never lost that smile and twinkle in his eye.

*Thanks,
Carl D. Kennel, Jr.*

Please convey to the entire staff of Ashley Court our thanks for the care received. The background of knowledgeable support of all your staff, helped to lift our spirits as we ventured into every visit. Seeing the continued well-being and dignity held for every individual living at Ashley Court, holds the highest recommendation in all aspects.

*With a sincere thank you,
Albert and Pat Buszka*

I can attest to the excellent quality of care provided by Ashley Court of Brighton to its residents. My mother resided there the last three years of her life. The staff at Ashley Court is truly an extension of each resident's family, giving care as if each resident were their own special parent or grandparent. The wonderful social activities and interactions provided a much needed part of life for my mom. I appreciated the layout of the facility, with smaller numbers of residents to a building and the home-like atmosphere inside and out, which is a big plus. The most valuable asset though is the care by all the wonderful caregivers.

*Sincerely,
Linda Rolley*

I would like to thank all of you at Ashley Court for the love, care, and kindness you all have shown to my Mom over the last 10 years. I have never had to worry about her care or treatment. I have always told friends facing dementia of one form or another in their parents, they do not really need intensive nursing care. What they really need is tender loving care and that is what mom always received. Thank you again.

Gene Monacelli
